

enago | Prepress Service Journal Production for STM Publishers

Academic journals are a medium of continually disseminating breakthrough knowledge from the frontiers of science and scholarship. Journals not only face the challenge of receiving and validating research but also are taxed with administrative tasks of regularly processing manuscripts and sharing published papers across platforms.

An industry specialist in academic and editorial services, Enago has ventured into Journal Production Services to assist STM journals in preparing and sharing content. Enago offers end-to-end Journal Production Services with workflows that help journal publishers get the best out of their content and publish articles online ahead of print.

We serve your journal needs by providing efficient production options and high turn-around time!

Our Journal Production Services include:

- ❖ Copyediting for a variety of subject areas
- ❖ Style and reference formatting as per journal requirement
- ❖ Image Processing
- ❖ Journal-customized XML-based typesetting
- ❖ Web PDF/Smart PDF
- ❖ Author communication, query resolution, and proof checking
- ❖ DTD-based (e.g., NLM DTD) SGML or XML file generation for websites and portals like PubMed
- ❖ Issue compilation and management
- ❖ Publication style guide preparation
- ❖ End-to-end project management

How can you gain a competitive advantage with Enago?

- Inferior editing creates author dissatisfaction and reduces the productivity of your staff and workflow. Top quality copyediting is the cornerstone of our services. With Enago,
- ❖ get an ideal balance between cost and quality
 - ❖ differentiate your publications by availing our top-notch copyediting
 - ❖ get manuscripts copyedited, organized, and published with a quick turnaround time
 - ❖ attract erudite scholars and deliver the most current information in your discipline(s)

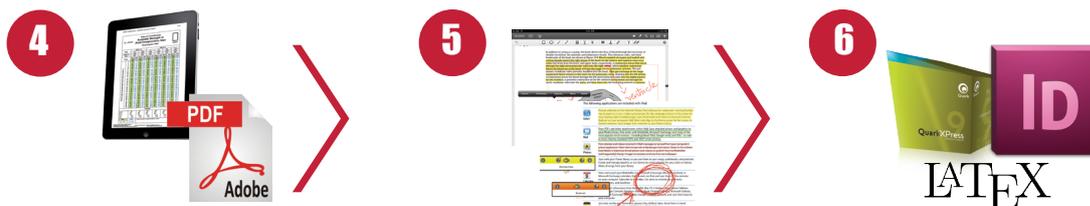

Based on client needs, we can also handle a range of ePublishing needs for books and magazines as well as media services.

All phases right from receiving an accepted manuscript to the release of the final issue are managed through a proficient yet simple process!

Our highly developed workflow for journal production

- reduces article turnaround time
- aids the speed-to-market publication requirement of our clients
- frees the production staff from managing this process manually

1. Jump-start journal production after peer review!

- Easily integrate manuscript submission systems
- Directly send peer-reviewed files
- All formats such as MS Word (copyediting), JPEG/TIFF (images), PPT/XLS (tables) accepted

2. End-to-end Project Management

Our project management (PM) team

- Analyses projects and develops workflows for STM journals
- Liaises with authors, editors, paginators, proofreaders, publishers
- Creates a style guide as per requirements
- Manages issue compilation
- Manages quality control at all steps

3. High quality professional copyediting

Our qualified editors from diverse subject areas

- fix any language (grammar and punctuation) and style error missed by the author
- exhibit 100% adherence to publisher style (language & formatting)
- exercise editorial judgment in the absence of style guidelines
- query authors for content, style gaps, references, and figures/tables
- flag any potential issues to the publisher
- format reference/citations according to APA, MLA, Chicago, Harvard, or client's house-style, including
 - ⇒ PubMed validation and cross verification
 - ⇒ Providing missing details (e.g., Issue No. or Vol.)
 - ⇒ Citation and reference matching and renumbering

4. Top-value typesetting for STM Journals

- XML-based typesetting using InDesign, QuarkXpress, FrameMaker, PageMaker, Corel Ventura, TeX, LaTeX, etc
- STM journal layout service includes
 - ⇒ Template creation
 - ⇒ Single and multiple column pagination
 - ⇒ Automated table formatting, equation/table/figure placement
 - ⇒ Author query insertion
- Error free author proofs (PDF) generated
- Final output available in any desired digital format

5. Automated delivery and return system for author proofs

- Publisher-branded platform for sharing article proofs
- Proof check simplified for authors by providing necessary instructions (e.g., PDF annotation instructions)
- Proof correction through hard copy, MS Word (with comments), or digital file (PDF annotation) supported as per publisher or author requirement.
- Notifications for proofs and author reminders sent at specific intervals

6. Revision and final release

- Author corrections made in the pagination file and PDF generated
- Digital PDF available for print or web
- DTD-based (e.g., NLM DTD) SGML or XML file generation for websites and portals like PubMed
- Validation tools run for XML integrity & preflight check done
