

## Description

**New York:** Enago, a global leader in editing and [publication support services](#), has announced a collaboration with Begell House Inc., specialists in bioscience and engineering publishing.

Begell House is an independent publisher that was established in 1991. It publishes research which intersects biomedicine and engineering and its' portfolio consists of an extensive collection of books, journals, proceedings, and reference works. Begell House editors, authors, and users are from leading research, academic and government institutions as well as corporations around the world.

Enago is recognized within the global research community for the quality of its content preparation and author-support services. Since its inception in 2005, Enago has worked with users worldwide, including businesses, researchers, publishers, universities and societies, in the process helping more than two million authors to produce high-caliber, high-impact research communication.

Commenting on the new collaboration with Enago, Yelena Shafeyeva, President of Begell House said "We work with scientists and engineers from all over the world. Every week, Begell House receives hundreds of submissions for publication. It is so important that we can provide the best possible level of service to our authors and enabling access to Enago's language and [editing services](#) will allow our authors to spend more time to focus on their research".

"We are delighted to collaborate with Begell House, supporting their authors and their publication goals," commented Tony O'Rourke, Vice President Partnerships at Enago. "Begell House publishes important titles in biomedicine and engineering. Authors can now use Enago's editing expertise at any stage during the writing and submission process, to ensure that their research outcomes can be expressed with as much clarity and impact as possible."
