

Description

Conducting a research study is an enormous task. It requires a lot of pre-planning and considerations. A thorough [literature review](#) needs to be carried out and a detailed plan of work needs to be made to ensure everything runs smoothly. Overlooking of small details can have an impactful outcome and result in wastage of time, money and effort. This checklist covers three significant aspects: Awareness, Planning, and Preparation that are essential to researchers before starting a new project. We hope this checklist ensures that you are adequately prepared to take on your next challenging project.
