

## Description

This checklist provides the researcher with an understanding of qualitative research. It helps the researcher through a qualitative research process by providing reminders or pointers for the research study. Qualitative research is explorative research, it seeks a detailed understanding of a phenomenon in a natural setting. It focuses on the experiences of human beings rather than the statistical and logical approach as employed in quantitative research. Qualitative research is widely used by political science, social work, and education researchers. This checklist will make it easy for researchers to conduct research effectively.
