

Description

Authors are required to follow prescribed writing styles, formats, and guidelines mandated by a research journal when submitting an article for publication. This is to ensure that an article is consistent with the language and presentation quality characteristic to that journal. These criteria are usually outlined on the "Instructions to Authors" (also referred to as "Guidelines to Authors") page/s of the journal. The first step in preparing an article for publication is to check the requirements specified by the target journal.

There are several generic requirements and conventions, and in addition, there are ones pertaining to specific subject areas. These are related to language and presentation, conventions, notations, citations, and other aspects. These guidelines are typically updated at periodic intervals at meetings of eminent and experienced editors in specific fields. Some of the commonly used style guides and manuals are listed below.

Listing of Style Guides

Type/Subject Area	Association/Organization	Style Guide
General	Modern Language Association	MLA Style Manual: 3rd Ed.
General	American Psychological Association	APA Style Manual: 6th Ed.
General	University of Chicago Press	Chicago Manual of Style: 16th Ed.
Physics and Astronomy	American Institute of Physics	AIP Style Manual: 4th Ed.
Chemistry	American Chemical Society	ACS Style Guide: 3rd Ed.
Biology	Council of Science Editors	CSE Manual: 7th Ed.
Mathematics	American Mathematical Society	AMS Handbook
Engineering	Institute of Electrical and Electronics Engineers	2009 IEEE Style Manual
Medicine	American Medical Association	AMA Manual of Style: 10th Ed.
Meteorology	American Meteorological Society	AMS Style Manual

The above list is representative but is not meant to be comprehensive.

Once an article is written in conformity with the appropriate guidelines specified above, professional <u>editing services</u> can be utilized to crosscheck or improve on both language and presentation aspects. This can serve to expedite both the editorial and <u>peer review process</u>, and increase the chances of that article being accepted for <u>publication</u>.
