

Description

Digital learning is the most sought after method for learning new things and to update yourself in this fast-paced environment. Digital learning is an ideal platform for the researchers to keep abreast with updates in the publishing and scholarly industry. It has numerous advantages, including flexibility, time management, and cost-effective as compared to its traditional counterpart. An educational course provided in an online setting, using a range of technologies is a digital learning process. The courses are offered in different forms, including audio and video recordings, presentations, quizzes, surveys, games, discussion groups, and more. This infographic provides a list of the benefits and also encourages researchers to try digital learning actively.

Digital Learning Benefits to Researchers

History

- In 1840, Isaac Pitman taught his pupils shorthand via correspondence. 
- In 1924, the first testing machine was invented that allowed students to test themselves.
