

Description

A researcher acquires diverse transferrable skills through their Ph.D. and postdoctoral fellowship positions. Researchers, who do not intend to pursue a career in academia, have multiple alternatives available to them. Entrepreneurship is one such interesting alternative that researchers can explore as a career option. Often, during their research study, researchers develop novel products that have the potential to be commercialized. In such cases, they build their business ideas around commercializing products that they have developed themselves.

This ebook will provide a list of guidelines that can be followed to successfully establish research-inspired entrepreneurship. A basic description of what it means to be a research-inspired entrepreneur and how can it be done would be discussed. A list of tips to keep in mind during this entrepreneurial journey is also shared in this free ebook.

We hope this resource helps you effectively establish yourself as a research-based entrepreneur.
