

Description

According to a study, it was found that there has been an increase of approximately 692.45% in predatory publication volumes in a decade[1]. While researchers are constantly facing the fear of “publish or perish” in academia, they tend to fall prey to predatory journals, which in turn leaves their research irrelevant. Thus, to make sure that your research reaches the right audience, it is imperative that you publish it in a journal that is reliable and genuine.

Instead of being persuaded by the “Call for Papers” from a journal you have never heard of, it’s essential to choose reputable ones to maintain the integrity and credibility of your work. To help you increase your research impact by publishing in reputable and reliable open access journals, we have created a fool-proof checklist that will make your publishing journey smoother than ever.

Download this FREE checklist on finding open access journals and get ready to publish your next paper.
