Agenda and Venue

We are glad to announce that **Enago** in collaboration with **University of Indonesia** will be conducting author workshops for early-stage researchers to help increase their awareness of academic publishing.

Enago's workshops will be focused on providing practical advice on the important aspects related to **journal selection** and tips on **presenting** research at various **international conferences**. The workshops will provide useful tips to authors on how they can directly address their target audience, successfully communicate the impact of their research and facilitate **effective scientific communication**.

These workshops will help the audience increase their awareness of the following:

- Understanding the differences between traditional and open access journals
- Improving accessibility and discoverability of research
- Awareness of different publication models and predatory publishing
- Preparing and giving poster presentations at international conferences
- Planning for presentations at international conferences
- Tips for non-native speakers to improve their presentation skills

At the end of the workshops, all participants will also receive a **Certificate of Participation** issued by Enago.

Workshop Agenda

Time (Local Time)	Topic
10:00 -10:30	Welcome
10:30 -12:00	Topic 1: Identifying the Target Journal for Publication
12:00 -12:15	Q&A Session
12:15 -12:45	Break
12:45 -13:15	Introduction to Enago's Author Services
13:15 -13:30	Q&A Session
13:30 -15:00	Topic 2: Effectively Presenting at International Conferences
15:00 -15:15	Q&A Session
15:15 -15:30	Closing Remarks

Venue

Date: 12th July, 2017, Universitas Indonesia

Address: Auditorium Vokasi, Universitas Indonesia,
Depok Campus, West Java

Website: <http://www.ui.ac.id/en/>

Email address for workshop inquiries: academy@enago.com

About the Speaker

Dr. Richard de Grijs,
Netherlands

Peking University

Publication and Training

Consultant, [Enago Academy](#)

- A distinguished astrophysicist, consultant, and a publishing expert, Dr. Richard de Grijs has a diverse academic profile and has driven several projects at well-renowned institutions such as the University of Virginia (USA), University of Sheffield (UK) and University of Cambridge (UK).
- At present, he is a Professor of Physics at the Kavli Institute for Astronomy and Astrophysics, Peking University. He is also a Discipline Scientist at the International Space Science Institute in Beijing and the Founding Director of the International Astronomical Union Office of Astronomy for Development, an institution under the International Astronomical Union.
- He is an active member of a number of academic and scientific societies such as the International Astronomical Union (IAU), Institute of Physics (UK), American Astronomical Society, Netherlands Astronomical Society, Royal Astronomical Society, and Asian Council of Science Editors.
- Some of his major achievements include the Exceptional Contribution Award (University of Sheffield, UK), Excellent Performance Award (Peking University, China), “Van Swinderen” Public Outreach Award (the Royal Netherlands Physical Society) and the Selby Award (for excellence in science-the Australian Academy of Science).
- He currently is a peer reviewer for *Nature*, *Science*, *Monthly Notices of the Royal Astronomical Society*, *Astrophysical Journal*, and *Astrophysics and Space Science*, as well as for book (series) proposals submitted to Wiley Academic Publishers and CRC Press. In addition to his role at the Kavli Institute for Astronomy and Astrophysics, Peking University, he is also currently the Deputy Editor of *Astrophysical Journal Letters*.

Workshop Brief

Topic 1: Identifying the Target Journal for Publication

In today's scientific landscape when researchers have to publish their research in order to sustain their academic careers, the process of selecting a good journal is a crucial step towards showcasing their research to the right target audience. Owing to an exponential increase in the number of journals over the last decade, selecting an appropriate journal has become increasingly difficult. This presentation is primarily targeted toward early-stage researchers who wish to publish their research, but find it difficult to select an appropriate journal for their manuscript.

After this session, you will have more information about the following:

- Understanding the scope, visibility and discoverability of a journal
- Assessing the quality of a journal and a basic understanding of some key journal metrics
- Introduction to important concepts such as copyrights, open access and peer review
- Expert tips and a list of tools for selecting an appropriate target journal

Topic 2: Effectively Presenting at International Conferences

Presenting at conferences is an important part of scientific communication and is very important for enhancing any researcher's career prospects. For early-stage researchers, addressing a large audience can be quite a daunting experience to present their study in an effective and time-bound manner. In this presentation, we will focus on some basic principles that will help early-stage researchers understand the importance of effectively presenting at international conferences. We will also share some tips to help non-native speakers improve their presentation skills.

After this session, you will have more information about the following:

- Guidelines on selecting relevant conferences
- Principles behind writing abstracts for conferences
- Planning and preparing content for conferences
- Tips for rehearsing presentations and overcoming stage fright
- Improving your professional network through international conferences
