

Description

I am a early carrier marine biologist. I want to connect with some funding agencies , so that I can apply knowledge to do the cutting age of research to over come the prices related to climate change, biogeochemistry of the oceanic waters , Ocean colour remote sensing, Phytoplankton pigment analysis by using HPLC or the calibration and validation ocean colour sensors/ PFZ forecast. I want to work on the sustainable management of ocean ecosystems. So I need to connect with the funding agencies as soon as possible.

Regards
