Hi,

I am preparing a [research paper](#) that its some data needs to be moved to the annex and/or appendix. These data that are going to be moved to the annex and/or appendix are different in nature. that is, some are related to the paper findings, while others are the general data coming from literature. So. I thing these data can be moved to two sections: 1) general data to annex and 2) finding data to appendix.

Am I right?

Thanks
