Description

Undertaking a research project is a huge responsibility. It requires the researcher not only to identify a research problem but also design a study to arrive at a significant solution to the research problem. There are numerous methods one can approach the research study. However, it is essential to identify the appropriate research design for the study to get a suitable result. Data collection when done accordingly ensures accurate results. This checklist will aid researchers to identify and work towards designing an effective research design and collect appropriate data using suitable methods.
