

## Description

**New York, USA:** Society for Automotive Engineers (SAE) and Enago have come together to offer high caliber author services, including [manuscript editing](#) and publication support to engineering researchers and to those within other technical and scientific disciplines.

SAE International is a leading global association dedicated to advancing the cause of engineering, particularly mobility engineering. SAE has over 127,000 members, including automotive, aerospace, and commercial-vehicle engineers and experts from around the world.

Enago is the preferred partner for researchers and institutions globally, for [manuscript editing](#) and [publication support services](#). Since 2005, it has assisted over 2 million authors to successfully publish quality research in high-impact journals internationally.

Commenting on the partnership, Michael Thompson, Director, Aerospace Product Group, SAE International said, “Our collaboration with Enago offers an excellent opportunity for SAE members as well as engineering researchers and scholars globally, to create and present impactful technical research. This will help aspiring authors achieve professional recognition as well as further the cause of the engineering industry. “

“Enago is pleased to partner with SAE, an organization that provides such a key platform for global engineers, students, and technical professionals to access knowledge and grow professionally,” said Robert Kasher, Vice President – Strategic Alliances, Enago. “We look forward to closely engaging with these audiences and provide them with the tools and the support they need to successfully publish high-quality research in international peer-reviewed publications.”
