1. The legend should give enough detail so that the figure can be understood without reference to the text.
??

2. Please ensure that artwork is prepared to fit across one or two columns or two-thirds width (71 mm, 149 mm or 109 mm, respectively).... If figures are prepared that will require reduction, please ensure that symbols, labels, axes text, etc., are large enough to allow reduction to a final size of about 8 point, i.e. capital letters will be about 2 mm tall.

4. Use greyscales (e.g. 0, 20, 40, 60, 80, 100%) in preference to pattern fills where possible. If colour figures are submitted for colour online publication only, ensure that after conversion to greyscale they remain entirely intelligible for the black-and-white print publication of your paper.

5. The cost for colour printing must be met by the author (currently £150 for the first figure, £50 thereafter, exclusive of VAT). If no funds are available to cover colour printing costs, the journal offers free colour reproduction online (with black-and-white reproduction in print).
