?? ????

Let's clear up the misunderstanding about the p-value used in almost all studies and have a correct understanding. It is the most basic concept, but it will be a valuable lecture that is not often encountered.

It will be helpful to anyone writing or reading future papers.

It will serve as a basic concept that will help you make your thesis sound and reproducible.

In this session, researchers will learn:

- Understanding and Misunderstanding of P Values ??Every Researcher Should Know

- Three common misconceptions about P values
- ways to solve this

About the speaker :

Jihyung Kim MD
