

Journal Selection Report

Message from the Journal Expert

Thank you for choosing Enago to assist you in selecting the most suitable journals for your paper. We have carefully reviewed your manuscript and have shortlisted five journals that are best suited to your paper. The selection and order of recommendation are based on a subjective opinion that takes into account the specifics of your article and various relevant journal characteristics. On the below pages, I have provided a comparison of the most relevant journal characteristics that may aid the submission and publication process, along with my comments to help you improve your manuscript. I have also provided a summary for each journal. Please check all the details presented in the summary and visit the webpages of the journals before making your decision.

Once you select a journal, you may also request our recommended services to help ensure that your submission meets all guidelines mentioned by the journal of your choice. Thank you again for choosing Enago to help you!

Journal Recommendations

The following journals have been shortlisted by our subject-area expert following a careful evaluation of your manuscript. The selection and order of recommendation are based on a subjective opinion which takes into account the specifics of your article and various relevant journal characteristics. Some of these characteristics, along with other information which may aid the submission and publication process are listed below.

Most Recommended Journal

Journal Name	Land Use Policy; The International Journal Covering All Aspects of Land Use
Journal Homepage	http://www.journals.elsevier.com/land-use-policy/
Reason for this Journal	This is a SCI indexed journal with a medium-low impact factor. With your given requirement for fast publication, this is best suited with regard to acceptance, journal quality, and publication frequency. It is international and interdisciplinary; it is a source used in other articles that are similar to this one.

Enago | Disclaimer: This report was compiled by our Journal Expert(s) after careful consideration of your manuscript considering several parameters. The author(s) should read the report carefully to choose the target journal.

This report is based on our expert's assessment of the manuscript and should not be considered as a guarantee of acceptance in any of the listed journals.

Journal Details

Journal Quality	Impact Factor = 2.292 Article Influence = 2.1 H-Index = 71
Article is suitable as	Original Article
Compatibility of paper with journal guidelines	Yes, but some minor changes are required. For example, the paper should be double spaced. However, the current one is single spaced. Also the references need to be limited to 20.
Review type	Peer Reviewed
Approximate time for peer review	30 days
Issues published per year	12
Databases where journal is indexed	SCImago, Scirus, Scopus, SOCOLAR, Zetoc
Publisher and country	Blackwell, USA
Accessibility	Hybrid
ISSN code	4560-223563

Enago | Disclaimer: This report was compiled by our Journal Expert(s) after careful consideration of your manuscript considering several parameters. The author(s) should read the report carefully to choose the target journal.

This report is based on our expert's assessment of the manuscript and should not be considered as a guarantee of acceptance in any of the listed journals.

Highly Recommended Journal

Journal Name	Journal of Land Use Science
Journal Homepage	http://www.tandfonline.com/action/aboutThisJournal?show=aimsScope&journalCode=tlus20
Reason for this Journal	This journal is highly recommended because It is relevant for the topic of the article; it has a broad scope. However, although this journal is listed in CAB Abstracts database, it is not an SCI listed journal.

Journal Details

Journal Quality	Impact Factor = 1.12 Article Influence = 2.0 H-Index = 32
Specific topics covered	The dynamics of change; the integration and feedbacks between land use, climate, socio-economic, and ecological systems; the resilience, vulnerability, adaptability and sustainability of land use systems; the linkages of natural and human systems; relationships between land use and land cover; spatial and temporal scale issues; accuracy issues; evolving public and private land and participatory approaches.
Article is suitable as	Original Article
Compatibility of paper with journal guidelines	The word count limit excluding references and abstract for this journal is 3000. Thus, some word count may need to reduce if you opt for this journal.
Review type	Peer reviewed
Approximate time for peer review	60 days

Enago | Disclaimer: This report was compiled by our Journal Expert(s) after careful consideration of your manuscript considering several parameters. The author(s) should read the report carefully to choose the target journal.

This report is based on our expert's assessment of the manuscript and should not be considered as a guarantee of acceptance in any of the listed journals.

Issues published per year	12
Databases where journal is indexed	CAS, Citebase
Publisher and country	Wiley Online Library (USA)
Accessibility	Subscription-based
ISSN code	5467567-124

Highly Recommended Journal

Journal Name	Land Economics
Journal Homepage	http://uwpress.wisc.edu/journals/journals/le.html
Reason for this Journal	This journal's topics covered math the papers' topic well. It is published by a major research university; the journal has a long history (published since 1925); its rankings are good; the scope is International. However, this is a high impact journal compared to others so the chances of rejection are higher.

This report is based on our expert's assessment of the manuscript and should not be considered as a guarantee of acceptance in any of the listed journals.

Specific topics covered	International applied research on such topics as transportation, energy, urban and rural land use, housing, environmental quality, public utilities, and natural resources.
Article is suitable as	Original Article
Compatibility of paper with journal guidelines	Yes, but minor changes are required. For example, a detailed cover page needs to be prepared which should include the paper title, author names, author affiliations, running title, no. of words and figures/tables, address for correspondence and financial disclosures, if any.
Review type	Peer Reviewed
Approximate time for peer review	30-60 days

Recommended Journal

Journal Name	Applied Economics
Journal Homepage	http://www.tandfonline.com/action/aboutThisJournal?show=aimsScope&journalCode=raec20
Reason for this Journal	The journal publishes empirical studies in various applied areas; the scope is broad. However, the publications per year are fewer compared to the other journals. Also there is a higher chance of rejection as the journal quality is high vis-à-vis the study is question.

Journal Details

Journal Quality	Impact Factor = 3.52 Article Influence = 2.8 H-Index = 51
Specific topics covered	Application of economic analysis to specific problems in both the public and private sectors; economics; finance, business & industry; macroeconomics

Specific comments of the Journal Expert

Our subject-area expert also offers the following suggestions which may improve the manuscript and/or expedite publication.

<p>Are various parts of the paper (abstract, introduction etc.) suitably written?</p>	<p>Yes, for the most part, the content of the sections is fine. I would suggest that in the introduction, the author should bring out more of the point about the negative consequences of land acquisition (Discussed on p. 7). That is, the author should tie in this point a little more with concepts and ideas that are laid out in the introduction.</p>
<p>Are the motivation for work and significance of results clearly explained?</p>	<p>Yes, this is relatively clear in terms of the concepts, but the expression is very weak. This aspect of the paper requires a lot of attention. It is difficult to follow the author's line of thought because of the lack of clarity at the sentence level: missing words, misuse/lack of articles, punctuation errors, issues with verb tense, and grammatical and mechanical errors. The formatting also could use some work, as it also hinders understanding. Some of the lists should possibly be bulleted. The sections and paragraphs could be made smoother, too, with better transitions and more explanations that tie together the author's thoughts. The writing is choppy, in other words, and this also contributes to the difficulty in understanding the paper.</p>
<p>Is the manuscript stating the findings appropriately?</p>	<p>The subject matter is intriguing, and the examples and supporting evidence are illustrative and engaging. Another observation is that the references seem "thin," and the paper could be strengthened in this regard, too—more sources and more current sources (some of the journals listed in the References don't seem to exist any longer, as I could not find any websites for them online; other sources seem outdated). Also, it's not entirely clear what some of these sources actually are. All of this is to say, the level of scholarship could be raised/improved.</p>
<p>Is the manuscript ready for publication in its current state? If no, what do the authors need to work on?</p>	<p>In its current state, the manuscript is not ready for publication. The author included limitations of the study at the end, as is the convention. However, an improved statement can be made in the introduction, especially regarding the time period being considered and what the paper can actually provide in terms of</p>

Enago | Disclaimer: This report was compiled by our Journal Expert(s) after careful consideration of your manuscript considering several parameters. The author(s) should read the report carefully to choose the target journal.

This report is based on our expert's assessment of the manuscript and should not be considered as a guarantee of acceptance in any of the listed journals.

	practical results, i.e., recommendations for action. We suggest the scope be specified more clearly in the text. The figures are based on varying time periods; therefore, some clarification would be helpful. There was no explicitly stated hypothesis, and this was appropriate for the topic. However, more could be mentioned about what the results indicate that the Japanese tourism industry should do to solve its seasonal problems.
Is the length compatible to all the suggested journals?	Yes, except as stated above.
Are all the finding appropriately stated and backed by substantial evidence?	Please note that Figure 3 is neither present in the manuscript nor mentioned in the text. Please check if Figures 4, 5, 6... should be renamed as Figures 3, 4, 5.... There is much repetition in the paper, and we have reduced most of it.
Is the research novel to this field?	This study sheds considerable light to the existing literature; however, the abovementioned changes are necessary to be made.
Recommendations for improving the manuscript	The paper requires Advance Editing to remedy the many sentence-level errors as well as the lack of cohesiveness. I think there is much that is good about the paper in terms of the author's ideas and the supporting details that are provided. The subject matter is intriguing, and the examples and supporting evidence are illustrative and engaging. Another observation is that the references seem "thin," and the paper could be strengthened in this regard, too—more sources and more current sources (some of the journals listed in the References don't seem to exist any longer, as I could not find any websites for them online; other sources seem outdated). Also, it's not entirely clear what some of these sources actually are. All of this is to say, the level of scholarship could be raised/improved.
